# 2020 DODGE CHALLENGER SRT® HELLCAT WIDEBODY

The 2020 Dodge Challenger SRT® Hellcat is nothing less than a legend. Packing a roaring 727 HP, the beast knows little competition. How could it get any more impressive?

## ENGINE

Mounted on SRT®'s 6.2-Liter HEMI® V8 the huge supercharger cranks out incredible power. Staggering 727 HP and 889 NM of torque required changes at the transmission and the rear axle. The rethought drivetrain smoothly handles the engines massive output and delivers when called upon.

## NEW DUAL SNORKY HOOD

The hood scoop is more than just for show. It is the only way, to supply enough air for the supercharged HEMI® powerplant. The new dual snorky hood optionally comes in satin black. The satin paint is a distinctive exterior treatment that gives your Challenger a unique appearance.

## AIR-CATCHER® HEADLAMP

More air for even more power. The SRT® Hellcat's illuminated Air-Catcher® Headlamp feeds additional air to the intake. Together with the redesigned massive hood scoop and a third air inlet above the front splitter, it makes sure your Challenger never runs out of breath.

## 2020 DODGE CHALLENGER R/T SCAT PACK WIDEBODY

Sit down, buckle up and hold on tight. From sinister speed to exceptional control, the 2020 Dodge Challenger R/T Scat Pack Widebody is breaking through the limits of performance instead of breaking the bank.

### WIDEBODY PACKAGE

More muscle! The Widebody Package now available for your Challenger R/T Scat Pack makes room for wider performance tires boasting more grip and an aggressive stance. The 89 mm Widebody fender flares make for an even more intimidating appearance.

### SRT® PERFORMANCE SPOILER

A perfect compromise between high speed on the drag strip and excellent control on the road and racetrack, the available SRT® spoiler helps reduce lift and increase stability, while complementing the sharply designed rear.

### SCAT PACK HERITAGE

A tribute to Dodge's golden era of muscle cars. The model name „Scat Pack“ and the respective Super Bee Logo on the Fenders, Seats and in the instrument cluster, pay homage to top-of-the-line models of the 60s Dodge lineup and their legendary quarter-mile performance.

- Power-Heated Mirrors

## 2020 DODGE CHARGER SRT® HELLCAT

Rule the road with the 2020 Charger SRT® Hellcat. Dodge boasts a legacy of performance and the all new Charger SRT® Hellcat continues that lineage. With heart-pounding power and unexpected daily usability, it makes for one unforgettable ride.

### WIDEBODY PACKAGE

More muscle! The Widebody Package is now available for the Dodge Charger: wider performance tires boasting more grip and a more aggressive stance. Perfectly fitted into the body design the front and rear fender flares make room for a new SRT® wheel design

in matt black and treat the Charger SRT® Hellcat to an additional 85 mm in width. The wider track and tires not only make for an appearance more intimidating than ever but also for improved performance - while braking, accelerating and cornering.

### FULL ACCESS RED KEY

The 2020 Dodge Charger SRT® Hellcat comes with two keys. The black one is meant for every day driving, letting loose only 500 of the 717 hp. The red key unlocks the entire brute force of the supercharged engine.

## 2020 DODGE CHARGER R/T SCAT PACK WIDEBODY

From grille to trunklid, developed to impress as both dynamic performance sedan and reliable daily driver. The new widebody package makes sure the Dodge Charger R/T Scat Pack looks the part and takes the performance to another level.

### HARMAN KARDON® SOUND

Push it to the limit with 900 watts and two subwoofers with the available 19-speaker Harman Kardon® Premium Sound Group. There is only one thing that can excel the power of this high performance system - and that's the HEMI® engine.

### PADDLE SHIFTERS

Shift gears with ease. The convenient die-cast metal paddle shifters let you keep both hands on the wheel so you can drive with confidence. Manually command the TorqueFlite® 8-speed gear box for elevated driver control and a more thorough driving experience.

### REMOTE VEHICLE START

With the available Remote Vehicle Start system you can start the engine on the push of a button on the key fob to preheat the front seats, automatically activate the climate control settings, window and mirror defrosters and warm up the engine.

CHARGER

## IMPORT

As an official importer for Dodge, we at AEC are the best source for your Dodge vehicle needs. Our vehicles are ordered directly from the manufacturer, configured to your specifications, and delivered directly to the European Union. We guarantee that our vehicles meet all country-specific specifications according to European law. When you are looking for a Dodge vehicle, AEC and the AEC dealer network is the place to go.

## HOMOLOGATION

AEC vehicles are prepared to manufacturer quality to meet all standards of the E.U. We can assist our customers with the technical conversion, documentation and certification of their vehicles throughout the entire European Union. Customers can rest assured that our extensive experience and that of our AEC dealers ensure that your vehicle meets the registration requirements of your country.

## FINANCING

As a European customer, you can rely on an extensive range of financial services via your AEC dealer. Our cooperation partner Santander Consumer Bank provides all financial services you will need. The Santander Consumer Bank is one of the biggest industry service providers for financial services. It has many years of experience in the automotive sector, as well as an excellent reputation.

## WARRANTY

AEC offers a wide range of industry leading warranty schemes for all Dodge vehicles. Two different insurance options are available: AEC Comfort is an insurance product that provides full cover for defects in the most important vehicle components (engine, transmission, differential, etc.) up to 100.000 km under the general insurance terms and conditions. AEC Premium is an insurance product based on the conditions in the factory warranty that provides full coverage for defects in all mechanical and electronic vehicle components up to 150.000 km under general insurance terms and conditions. Duration: 24 / 36 / 48 months of warranty are available for your AEC Dodge vehicles.

UP TO 48 MONTHS PREMIUM PROTECTION

ALL MECHANICAL AND ELECTRICAL SPARE PARTS

FULL REIMBURSEMENT OF LABOUR AND SPARE PARTS UP TO 150.000 KM

## TERMS AND CONDITIONS OF WARRANTY FOR NEW VEHICLES SCOPE OF AEC COMFORT

**§ 1 Subject matter 1.** The seller/guarantor Auto Export Corporation (hereinafter referred to as "AEC"), 24 Commerce Place, St. Catharines, Ontario, Canada, L2S 0B3) gives the buyer/guarantee holder (dealer), under the other conditions set forth in § 4, a guarantee of the functionality of the assemblies specified in § 2(1) for the term set in the guarantee agreement. The dealer assigns their right under these guarantee conditions to the vehicle buyer named in the guarantee agreement. The vehicle buyer accepts this assignment. Compensation will be provided according to the guarantee if one of the guaranteed parts loses its functionality within the agreed guarantee term, and not as a result of a fault in non-guaranteed parts, so that a repair becomes necessary. The guarantee applies within the country, to temporary trips such as holiday and business trips, and also throughout Europe. A temporary trip does not include when the vehicle is predominantly abroad for a period of more than six weeks. The guarantee does not justify any claims for revoking the purchase contract or reduction (reduction of the purchase price). If the repair is unsuccessful twice, the buyer/guarantee holder may request that another specialist garage be commissioned to carry out the repair. This guarantee does not exclude any eventual claims of the buyer under the statutory guarantee. Another condition for guarantee claims is compliance with the requirements of § 4. 2. CAR-GARANTIE GMBH (hereinafter referred to as "CG"), Gündlinger Strasse 12, D-79111 Freiburg, is authorized by the seller/guarantor (AEC) to process the entire guarantee with the buyer/guarantee holder on its behalf and for its account. Notices of amendments (such as a change of holder) and claims subject to guarantee shall be reported to CG.

**§ 2 Scope of the guarantee 1.** The guarantee covers (list is final): Assembly – Parts a ) Engine- Engine seal ring housing; interior parts associated with the oil circuit; engine oil cooler; engine block; camshaft housing; oil pressure switch; oil filter housing; oil level sensor; sump; flywheel / drive pulley with sprocket; tensioning pulley for timing belt; timing case cover; timing belts; pulley for timing belts; valve stem seal; cylinder head; cylinder head gasket. b ) Manual/automatic transmission - Switch/automatic drive pulley; torque converter; transmission oil cooler; transmission housing; internal parts of the manual and automatic transmission; clutch master cylinder; clutch slave cylinder; control unit of the automatic transmission. c ) Axle/automatic transmission Flange; transmission housing; internal parts of the axle and transfer case. 2. The guarantee covers seals, gaskets, oil seals, hoses, piping, spark plugs and glow plugs only if they lose their functionality as a result of damage caused to one of the parts specified in paragraph 1. 3. The guarantee does not cover: a ) parts not approved by the manufacturer; b ) operating and auxiliary materials such as fuels, oils, refrigerants and antifreeze, coolant, air conditioning compressor oil, hydraulic fluids, grease, cleaning agents, all filters and filter cartridges and small parts.

**§ 3 Exclusions** No guarantee applies without consideration of contributing causes of damage: a ) by accident, such as an event directly resulting from a sudden external mechanical force; b ) through improper, mischievous or malicious actions, misappropriation, in particular theft, unauthorized use, robbery and embezzlement, damage that is directly caused by animals, storm, hail, frost, corrosion, lightning strike, earthquake or water ingress, as well as by scorching, fire or explosion; c ) by war events of any kind, civil war, civil unrest, strike, lockout, terrorism, vandalism, seizure or other sovereign interventions, or by nuclear energy d ) arising from participation in driving events with racing character or from associated practice rides; e ) by altering the original design of the motor vehicle (such as tuning, VMAX suspension, gas conversion, etc.) or by installing third-party or accessory parts that are not approved by the manufacturer; f ) by the use of a part that is recognizably in need of repair, unless the damage can be shown to be unrelated to the need for repair, or when at the time of the damage the part had been at least provisionally repaired by a trained professional; g ) when the buyer/guarantee holder has at least temporarily used the motor vehicle for commercial passenger transport or if the motor vehicle has been leased commercially to a changing group of persons; h ) caused by the use of unsuitable operating materials or by a lack of operational materials (lubricants, oils, cooling water, etc.); i ) for which a third party is required to intervene, which is rectified as an expression of the manufacturer's goodwill, or which are caused by a manufacturing or material defect that occurs in large numbers of the vehicle type (serial defect) and for which in principle manufacturer's scope comes into consideration according to type and frequency.

**§ 4 Condition for guarantee claims** The condition for any guarantee claims is that the buyer/guarantee holder, 1. before the claim event: a ) has carried out and documented the maintenance, inspection and care on the vehicle that is prescribed or recommended by the manufacturer at the dealer or in a motor vehicle master workshop according to manufacturer's instructions. Exceeding the manufacturer's kilometre specification of up to 3,000 km or the manufacturer's timeframe of up to three months is harmless, whereas the exceeding of one of the specified specifications already precludes a guarantee claim. A guarantee claim is only contrary to one of the aforementioned requirements if it is responsible for the occurrence of the damage. Concurrent causality is sufficient. Concurrent causality is suspected. The buyer/guarantee holder is at liberty to prove the lack of causation. b ) fails to indicate interventions or other influences on the odometer, immediately indicates a defect or the need for immediate replacement of the odometer indicating the mileage c ) follows the vehicle operating instructions of the manufacturer. 2. after the claim event: a ) immediately notifies the seller/guarantor (AEC) or the CG at their relevant registered offices the relevant damage under guarantee after the occurrence of the same but before the repair, by phone or by email; b ) has the repair done by the dealer. After consultation with CG, the repair can also be carried out at another qualified vehicle garage; c ) demonstrates CG any maintenance or care performed since the beginning of the guarantee with invoices from the dealer or the executing workshop by submitting copies of the documents; d ) allows an authorized agent of the seller/guarantor (AEC) and/or of CG to carry out an inspection of the damaged parts at any time and, upon request, provides the information necessary to establish the damage; e ) reduces the damage as much as possible while following the instructions of CG; if circumstances permit, he shall obtain such instructions before the repair begins.

**§ 5 Reimbursement of costs 1.** Guarantee-related labour costs will be fully reimbursed to the buyer/guarantee holder according to the manufacturer's standard working hours. Guarantee-related material costs are paid at most according to the non-binding price recommendations of the manufacturer. 2. If the repair costs exceed the value of an exchange unit that is customarily installed in the case of such damage, the obligation to pay compensation shall be limited to the cost of this replacement unit, including removal and installation costs, applying paragraph 1. 3. The maximum amount of compensation subject to guarantee is limited to the time value of the damaged vehicle at the time the guarantee claim occurs per claim. 4. No compensation is paid for: a ) the costs for testing, measuring and adjustments (according to the manufacturer's working time standard), insofar as they are not incurred in connection with damage requiring compensation and maintenance, inspection, cleaning or care work prescribed or recommended by the manufacturer; b ) the replacement of direct or indirect consequential damages, such as shipping and disposal costs, parking fees and compensation for lost use; paragraph 5 shall remain unaffected hereby. 5. Expenditures for mobility If agreed separately in the guarantee agreement, the expenditures for achieving mobility (i.e. towing, rail travel, rental car, accommodation and telephone costs) will be reimbursed.

**§ 6 Claims settlement 1.** CG assumes responsibility on behalf of the seller/guarantor (AEC) for processing all claims with the buyer/guarantee holder. A repair invoice must be submitted to CG containing a clear and detailed description of the work performed, the spare parts prices and the labour costs with standard working hours. 2. In every case, the guarantee shall be notified to CG by phone prior to the repair so that CG can authorise the repair. A telephone service is available for this: Monday to Friday from 8:00 am to 5:00 pm at +49 761 4548-954.

**§ 7 Assignment of claims and statute of limitations 1.** In the event the vehicle with the guarantee is sold, the guarantee claims pass to the new holder with the ownership of the vehicle. Any change in ownership must be reported to AEC or CG in writing no later than 14 days after the change in the holder. 2. Claims under the guarantee lapse six months after the claim event, at the latest six months after the end of the guarantee term.
